

## Viewing Exhibits at the Bicol Science and Technology Centrum

### ABOUT THE SERVICES

The BSTC is a joint undertaking of the city government of Naga and the Department of Science and Technology with the Primary objective of enhancing science consciousness and literacy of the Bicolanos through non-formal science education in an interactive learning environment characterized by fun, adventure, creativity and self-discovery.

It aims to promote non-formal science and technology education through the conduct of various science programs and activities and the hands-on and kinetic manipulation of science interactive exhibits demonstrating various science principles. Clients may visit the Centrum and explore the following galleries:

- **MAIN GALLERY** – with an assortment of interactive exhibits demonstrating various science concepts and principles from the different areas/branches of science.
- **SCI-ART CUBBYHOLE** – play area that caters to kids 7 years old and below. A collection of interactive toys (Little Tikes and LEGO building blocks) that helps in the psychomotor development of children
- **GALLERY ON LIGHTS, COLORS AND SHAPES** – an existing exhibition on the interplay of light and various colors and shapes. One of the favorite galleries of both the young and the old.
- **ASTROMONOMY GALLERY** – a virtual space travel adventure. The gallery showcases a number of solar system models, orbiters, scale model of space crafts, murals, EX3 mobile planetarium system, seven astronomical binoculars and two MEADE computerized telescopes.
- **ENVIRONMENTAL GALLERY** – a gallery that functionally showcase the Naga River, its marine life and aquatic resources, explicating measures to protect and preserve its ecosystem. Consist of a miniature river, a large aquarium and digital animated presentation titled “Lola Pia”..
- **OPTICAL ILLUSION GALLERY** – a collection of framed puzzles, abstract shapes and drawings that keep you from seeing what’s there – or make you see something that isn’t there at all!

### Skywatch Gallery

BSTC also has a SKYWATCH GALLERY, which features telescopes for stargazing, and an EX-3 Mobile PLANETARIUM System. The planetarium is a simulation of the night sky especially our solar system and a number of constellations found in our Milky Way Galaxy. The use of this gallery, however, is only available upon request.
